Motor Mechanic

Job Description

- § discuss problems with car drivers or vehicle operators to discover faults, listen to engines, fit and operate special test equipment and test drive vehicles
- § repair or replace worn and faulty parts by removing assemblies such as engines, transmissions, differentials or steering gear; dismantle them and check parts, referring to manuals as necessary
- § reassemble, test, clean and adjust repaired or replaced parts or assemblies, use various instruments to make sure they are working properly and put them back into the vehicle
- § tune engines using special electronic equipment and make fine adjustments (e.g. to carburettors) for smoother running
- § carry out minor body repairs and minor trim repairs
- § diagnose, repair and replace engine management/fuel injection components
- § use oxy, electric, TIG and MIG welders
- § test and repair electrical systems such as lighting, instrumentation, ignition and electronic fuel injection
- § inspect vehicles and issue roadworthiness certificates or list the work required before a certificate can be issued.

Eligibility

AQF Certificate III or higher qualification. Registration or licensing may be required
